

AI Dataset Labeling Marketplace

API Contract Reference — Review-I (v1)

Authentication

Method	Path	Auth	Purpose	Request Body	Response
POST	/api/auth/register	No	Register a new user account	name, email, password	User object
POST	/api/auth/login	No	Authenticate and issue JWT access token	email, password	JWT access token
GET	/api/auth/me	Yes	Retrieve current authenticated user profile		User object

Datasets

Method	Path	Auth	Purpose	Request Body	Response
POST	/api/datasets	Yes	Create a new dataset	title, description, dataset_type	Dataset object
GET	/api/datasets	Yes	List all datasets	—	List of Dataset
GET	/api/datasets/{dataset_id}	Yes	Retrieve a single dataset by id	—	Dataset object
PUT	/api/datasets/{dataset_id}	Yes	Update an existing dataset	title, description, dataset_type	Dataset object
DELETE	/api/datasets/{dataset_id}	Yes	Delete a dataset	—	Status message

Labeling Jobs

Method	Path	Auth	Purpose	Request Body	Response
POST	/api/jobs	Yes	Create a new labeling job for a dataset	dataset_id, title, description	LabelingJob object
GET	/api/jobs	Yes	List all labeling jobs	—	List of LabelingJob
GET	/api/jobs/{job_id}	Yes	Retrieve a single labeling job by id	—	LabelingJob object
PUT	/api/jobs/{job_id}	Yes	Update an existing labeling job	title, description, status	LabelingJob object
DELETE	/api/jobs/{job_id}	Yes	Delete a labeling job	—	Status message

Note: "Auth" = Yes indicates the endpoint requires a valid JWT bearer token issued at login. Request/response shapes above summarize the currently implemented fields only; exact JSON schemas are defined by the FastAPI Pydantic schemas in the codebase.

Authoritative interactive API documentation is provided by FastAPI Swagger/OpenAPI at /docs during local execution.
